

Questionnaire

Your name: [REDACTED]

Your email address: [REDACTED]

Your institution: Children's Hospital of Eastern Ontario Research Institute

Your position: Research Associate

Undergraduate student	[]
PhD student	[]
Technician	[]
Postdoc	[x]
Faculty member	[]

Question 1: In a scale from 1 - 10, how important do you think it is to have quick access to the following type of information about each gene or protein?

- a. Protein-protein interactions [1-10]: 9
- b. General function of the gene/protein [1-10]: 6
- c. Diseases a gene/protein is involved in [1-10]: 9
- d. Biochemical pathways a gene/protein is part of [1-10]: 7
- e. Cell types/tissues where your gene/protein is expressed [1-10]: 3
- f. Your protein's 3D structure (PDB) [1-10]: 9
- g. Popularity of the gene/protein in **social networks (Twitter, Facebook)** [1-10]: 2
- h. Knowing the **average impact factor** of the journals where a particular gene/protein is normally published [1-10]: 1
- i. The **relative scientific weight (e.g. by h-index)** of the scientists that work on your gene/protein [1-10]: 1
- j. How popular your gene/protein is in recently awarded grants (this is public information once a grant is awarded) [1-10]: 1
- k. What other genes/proteins are discussed in the context of your protein [1-10]: 4

- l. How your gene/protein is regulated at the transcriptional level [1-10]: 1
- m. How your gene/protein is regulated post-translationally (phosphorylation, ubiquitination) [1-10]: 7
- n. What is the **most popular type of experiment** other scientists typically do on your gene/protein [1-10]: 1
- o. What **biochemical kits** are available for doing these experiments [1-10]: 1
- p. Other (explain what type of information) [1-10]:

Question 2: What websites do you visit the most when analysing your list of genes/proteins? NCBI
 What type of information do you expect to get from each of these websites? Genomic, Proteomic, Functional and Disease.

Some examples of websites include:

- Ensembl (www.ensembl.org)
- NCBI's Entrez (<https://www.ncbi.nlm.nih.gov/Class/MLACourse/Original8Hour/Entrez/>)
- NCBI Databases (<https://www.ncbi.nlm.nih.gov/search/>)
- EuPathDB.org (Eukaryotic Pathogens Database)
- Galaxy (<https://usegalaxy.org/>)
- PubMed (<https://www.ncbi.nlm.nih.gov/pubmed/>)
- UniProt (<http://www.uniprot.org/>)
- KEGG Pathway Database (<https://www.genome.jp/kegg/pathway.html>)
- Any other resource you use routinely.

Website	Type of information sought	Priority in your analytical pipeline
<i>Example:</i> PubMed	Find out what's been published about my gene or protein	1

<i>(expand the table as needed)</i>		

Question 3: How often do you perform these exploratory analyses on your genes or proteins:

- [a] Daily
- [b] Weekly
- [c] Monthly
- [d] Several times a year
- [e] Other (explain)

Question 4: If you could obtain the same type of information that you seek by doing these analyses **in 5 minutes only**, how often would you now perform these analyses?

- [a] Daily
- [b] Weekly
- [c] Monthly
- [d] Several times a year
- [e] Other (explain)

Question 5: When you get a **list of genes/proteins** from a proteomics or a differential expression experiment, what **steps and tools** do you follow for the analysis?

1. Search the literature (PUBMED)
2. Search proteomic databases (NCBI, UNIPROT, PDB DATABANK)
- 3.
- 4.
- 5.

Question 6: Now and related to the previous question, instead of telling me what steps you follow in your analysis, if I asked you **what type of information you would like to know** about each one of your genes or proteins, what would you be interested in knowing?

Here you can include some information you would love to have **but do not know** how to obtain it.

1. Disease relation
- 2.
- 3.
- 4.
- 5.

Question 7: If you have a long list of genes/proteins from a high-throughput experiment you ran in the lab, **what are the most useful factors in determining the next follow-up experiment?**

E.g. how easy the potential experiment is, how relevant the cell type, how much money this would cost, etc.

1. Perform a complementary experiment to validate the hits.
- 2.
- 3.

4.

5.

Question 8: What do you think is the **most competitive advantage against other competing laboratories** when trying to decide what the next follow-up experiment would be?

1. Having more money, resources at owns' disposal.

2.

3.

4.

5.
